1. Materials Needed

Pair of tube socks, scissors, lots of batting, fabric marker (chalk), sewing thread (black), sewing needle, embroidery thread (white), hot glue gun, eyes, nose, bell, large jump ring, yarn (black), colored hemp for whiskers, ¼" buckle, measuring tape, and a stick to turn sock inside out and stuff the batting.

2. Turn sock inside out.

3. Fold one on the side and the other straight with heal up.

4. Iron

5. With your chalk draw the legs on the one that is straight and the other draw the ears, tail and arms. See pattern below.
6. Using a straight stitch on your sewing machine and matching thread, sew the legs and stop at the middle on both legs.

7. Sew the tail and arms leaving the tops unstitched. Sew the ears leaving the bottom of the ear unstitched.

8. Cut the nose, tail, ears, and arms. Cut the legs to the middle.

9. Turn right side out.

10. Stuff the body, legs, arms, and tail with the batting.

11. Use the stick to push batting to the ends.

12. Do not stuff the ears and nose until they are hand sewn on the body. Tie a piece of black yarn around the neck to make a head.
13. Turn ends inside about ¼ inch and hand sew the arms and the tail to the body.

14. *Start hand sewing with this great “No Knot” trick I use. (With a long piece of thread fold in half and double it. Put both cut ends of thread through the eye of the needle. Insert your needle into the material and draw the thread through leaving a loop not pulled through. Insert the needle and thread into the loop and tighten). “No Knot”!

   Attach to the body doing a straight stitch on the arm then a straight stitch on the body all the way around and tie a knot to finish off. Sew loose end into the sock. Do the same with the tail.

15. Stuff the nose with batting and pin it to the face and sew around using the straight stitch method.

16. Sew on the ears and leave a small opening to stuff them with batting. Sew between the legs.
17. (Whiskers) Measure from the nose to the body and double it.

18. Cut 5 pieces of colored hemp or string and tie a knot in the middle.

19. Sew whiskers to the nose.

20. Hot glue bead or sew a button on over the knot of whiskers for a nose.

21. Hot glue eyes on head.
22. Sew mouth on with embroidery thread.

23. Finish off the end at the neck and tie a knot.

24. Make a collar.

25. Put a bell on a large jump ring then attach to ribbon. Attach one end of ribbon to the buckle and measure around the neck.

26. Attach the other end of ribbon and pull tight around the neck. Hot glue ribbon to the other side of ribbon.
Your Sock Kitten is done!
Finished size is 30” long from the ears to the tip of the tail.

Have a great time making this adorable Sock Kitten!
